LinkedIn: linkedin.com/in/steve06/ | GitHub: github.com/steve3301

PROFESSIONAL SUMMARY

Entry-level Cybersecurity Analyst and Penetration Tester with hands-on experience in web application security, network security, vulnerability assessment, and red teaming. Skilled in identifying critical vulnerabilities such as SQL Injection, XSS, and IDOR using Kali Linux, Burp Suite, Nmap, SQL Map, and Metasploit. Strong analytical and problem-solving skills with a data-driven approach to identifying security threats. Seeking an entry-level VAPT, SOC Analyst, or Penetration Tester role.

TECHNICAL SKILLS

Web Application Security: OWASP Top 10, SQL Injection, XSS, IDOR, Authentication Flaws

Security Tools: Burp Suite, Nmap, SQL Map, Metasploit, Wireshark, Hydra, Nikto, Gobuster, Kali Linux

Networking: TCP/IP, VLANs, ACLs, NAT, DHCP, DNS, OSPF, EIGRP, Cisco Routing & Switching, pfSense, Cisco ASA

Programming: Python, Bash

Operating Systems: Kali Linux, Linux, Windows, Windows Server 2019/2022

PROJECTS & HANDS-ON EXPERIENCE

Web Application Penetration Testing Lab Burp Suite | SQL Map | Nikto | PortSwigger 2026

- › Tested four intentionally vulnerable platforms: DVWA, OWASP Juice Shop, PortSwigger Web Security Academy, and TryHackMe.
- › Performed automated vulnerability scanning using SQLMap and Nikto across 4 intentionally vulnerable web applications and documented findings in professional penetration testing reports.

TryHackMe & Hack The Box 175+ Rooms Completed 2026

- › Completed 175+ rooms across 5+ categories including Linux, Windows, Web Exploitation, Networking, and Privilege Escalation, progressing from beginner to advanced difficulty.
- › Solved 20+ HackTheBox machines, gaining practical experience in penetration testing, forensics, cryptography, and binary exploitation.

Enterprise Networking Lab Cisco Packet Tracer | GNS3 2026

- › Designed and configured a 3-tier enterprise network connecting 15+ devices, implementing 8+ networking technologies including VLANs, Inter-VLAN Routing, DHCP, ACLs, NAT, EIGRP, OSPF, and Wireless LAN.

Home Lab & Wi-Fi Security Lab Kali Linux | pf Sense | ESP8266 | Wireshark 2026

- › Built a five-machine home lab using Kali Linux, Windows, pfSense, DVWA, and OWASP Juice Shop to practice enumeration, exploitation, privilege escalation, and post-exploitation techniques.
- › Simulated Evil Twin and deauthentication attacks using ESP8266; developed a Python SSID/BSSID detection script that successfully identified 3 rogue access points.

EDUCATION

Cybersecurity – Red Teaming & Penetration Testing | Systech Professional Training, Trichy | 2026

BTech – Artificial Intelligence & Data Science | CGPA: 7.5 | Saranathan College of Engineering, Trichy | 2022–2025

TRAINING & ACHIEVEMENTS

CCNA | CCNP | CWNA | MPLS Fundamentals | TryHackMe – 175+ Rooms | Hack The Box – 20+ Machines | Systech Cybersecurity Training – 2026
